

Duncan Seawall's Complete Guide to: Permits

No job is too small or large for Duncan Seawall.
We can complete your entire marine construction project from beginning to end, starting by obtaining all necessary permits and ending with cleanup.

We often hear similar questions from multiple clients about the process of obtaining permits. The following are common FAQ's to help answer any questions you may have about permits.

1. How do I get a permit?

Duncan Seawall takes care of the permitting process for its customers.

2. How much does a permit cost?

Depending on where you live and what the permit is for, permits can range from \$300 to \$1,500.

3. How long does it take to get a permit?

A permit can take anywhere from 30 to 60 days, depending on the job it's for.

4. Do I have to get my permit?

No, after a contract has been signed, Duncan Seawall will handle the permitting process.

5. After I receive my permit, when can I expect my work to start?

Typically after a permit is received, work can start in as little as 3 to 6 weeks.

6. How long does a permit last?

Depending on where you live, a permit lasts 6 months to a year.

7. After a permit is issued, what is the process for submitting revisions?

Re-submitting the changed revision back to the municipality for approval.

8. Are there any special permit requirements for Condominium/Villa/Town Home/Mobile Home Park residents?

Yes, depending on the job.

9. Will I need separate permits for my dock and boatlift or dock and seawall?

Where you live will determine if you will need separate permits or not. Charlotte County requires an application to be submitted for each specific job.
